

Summary

Experienced Software Developer with over 6+ years of experience in developing and optimizing high-performance backend systems using Python, Golang, Node.js, and Django. Strong expertise in building scalable applications and integrating with cloud platforms like AWS and Azure. Proven ability to develop, deploy, and manage Django-based web applications, including integration with Django REST Framework (DRF), cloud technologies (AWS, Azure, ECP, Hydra), and performance optimization tools. Adept at working in agile environments with a focus on security, reliability, and system scalability.

Technical Skills

- **Programming:** Python, JavaScript, TypeScript, Golang
- **Backend Technologies:** Django REST Framework (DRF), FastAPI, Express.js, gin, mux
- **Cloud Platforms:** Google Cloud Platform (GCP), Azure (App Services, SQL/PostgreSQL, Key Vault)
- **Databases:** PostgreSQL, MySQL, Redis, SQLAlchemy
- **DevOps & Tools:** Kubernetes, Terraform, Docker, Prometheus, Grafana, Azure DevOps
- **Other:** Event-driven architecture, CI/CD, OPA Rego, System Design

Experience

Software Engineer II (Backend | Golang | GraphQL | Microservices)

Skillikz (Contracted to American Express - Global Loyalty & Benefits) - Burgess Hill, UK - Hybrid [Jan 2024 – Present]

Product & Collaboration Highlights:

- **Played key role in feature roasting** sessions in PI planning with team members and product managers, ensuring a clear understanding of the technical and product side of each feature.
- Worked closely with **product teams** to define and refine user stories, ensuring alignment with business goals.
- Collaborated with cross-functional teams, including designers and product managers, to deliver high-quality features that meet customer expectations.

Platform Contributions:

- Led **digital transformation** efforts, migrating legacy systems to a modern microservices-based architecture, significantly improving scalability and reliability.
- Built and maintained **gRPC-based services** and **event-sourced components** for Amex's V3 loyalty platform, enabling better system scalability and performance.
- Integrated **GraphQL APIs**, improving data-fetching efficiency by 70%, leading to better user experiences and faster response times.
- Designed and developed **REST API clients in Go**, enabling seamless integration with external systems and third-party services.
- Enabled **real-time observability** using **Prometheus** and **Grafana**, reducing API latency during peak hours and improving debugging processes.
- Enhanced test suite performance by implementing **BDD with Godog**, resulting in a **3x faster execution** time for test cases.

Software Engineer (Backend | Golang | Python | Cloud | Microservices)

Investmates - India - Remote [Aug 2022 – Sept 2023]

Product & Collaboration Highlights:

- **Collaborated with product managers and designers** to understand feature requirements and align technical solutions with business objectives.
- Played an active role in **feature grooming**, ensuring technical clarity and contributing to the definition of **stories** and **acceptance criteria**.
- Actively contributed to the **technical review process**, providing feedback on **product designs** and potential technical challenges.
- Worked cross-functionally with frontend, product, and data teams to **ensure smooth implementation and timely delivery** of new features.

Platform Contributions:

- Developed and deployed **cloud-native microservices** using **Golang** and **Python (FastAPI)** on GKE with Terraform, ensuring high scalability and reliability.
- Designed and implemented a **media processing pipeline** integrating **FFmpeg**, **Redis**, **PostgreSQL**, **AWS S3**, and **CloudFront**, enabling global content delivery with low latency.
- Integrated **AWS Rekognition** and **Pub/Sub** workflows for real-time content moderation, contributing to a safer user environment.
- Owned end-to-end development for features, from **design to deployment**, collaborating with cross-functional teams to align with business goals.
- Actively worked on **optimizing backend systems**, reducing latency, and resolving **scalability bottlenecks** during traffic surges.
- Continuously addressed **technical debt**, refactoring code and improving internal tooling to enhance overall development efficiency and product quality.

Software Developer (Backend | Search Optimization)

Codice Dev - India - Remote [Nov 2021 – Aug 2022]

- Developed Go-based monolithic applications for Inflect Marketplace.
- Integrated advanced search with Algolia and enhanced data handling with DGraph.
- Built efficient backend systems to manage high-volume customer engagement and transactions.

Software Developer (Full Stack | Flutter | Python | NodeJS)

Calx Riyadh, Saudi Arabia, OnSite [Aug 2019 – Nov 2021]

- Developed a project management platform called **Baseer** using **Django** (Python), **Node.js**, and **Flutter**.
- Contributed to **PostgreSQL** performance optimization and efficient database queries.
- Integrated **Azure App Services** to deploy Django applications in a **cloud-native** environment.
- Configured and managed **Azure SQL** databases for optimized Django ORM interactions.
- Set up **CI/CD pipelines** using **Azure DevOps** to automate deployment processes.
- Integrated **Azure Active Directory (Azure AD)** for authentication and OAuth2 for secure access control.
- Utilized **Azure Key Vault** to securely manage secrets like database credentials and API keys.
- Improved the performance of the platform by integrating **Azure Application Insights** for monitoring logs, errors, and performance metrics.

Network Security Engineer

SonicWall Inc - Bangalore, India - OnSite [Nov 2017 – Feb 2019]

- Configured and Implemented and managed security policies for gateway devices, routing, and switching infrastructure.
- Worked with networking protocols like **DNS**, **HTTP**, **TLS**, and **SSL Certificates** to ensure secure communication and reliable system operations.

Education

Bachelor of Technology in Computer Science & Engineering

Islamic University of Science & Technology (IUST), Jammu & Kashmir, India
2017

Languages

English, Kashmiri, Hindi, Urdu
