www.github.com/Davidamgad2

Passionate backend developer with 3+ years of experience designing scalable systems, REST/GraphQL APIs, and distributed applications using Kafka, RabbitMQ. Proficient in Python, Golang, Nodejs and cloud technologies (AWS, Azure). Adept at Agile workflows and mentoring teams.

EDUCATION

BACHELOR'S DEGREE, AIN SHAMS UNIVERSITY, JUL 2022

I graduated from the faculty of engineering.

- Major: Electrical
- Overall grade: good
- Graduation project: Excellent
- Exempted from military services
- English level: B2

EXPERIENCE

BACKEND DEVELOPER, INTELLA, Nov 2023 – Present

Responsibilities:

- Design, modify, develop, write, test, and implement software systems.
- Implement web services and REST APIs, GRPC to power the systems.
- Obfuscate Code for security.

Tech stack:

- FastAPI, Typescript, Express, NestJs, Kafka, Redis, Django, Kafka.

BACKEND DEVELOPER, LENME, Jun 2023 – Nov 2023

Responsible for:

- Design and build new back-end services.
- API design and development.
- Maintain and improve the performance of existing software.
- Write tests for existing and created code to ensure compatibility and stability.
- Multi-task and manage priorities in a fast-paced environment.
- Rapidly design, prototype, and iterate to solve problems and fix bugs.
- Tech stack: Python, Django, PostgreSQL, AWS

SOFTWARE ENGINEER, TECO, Oct 2022 – Jun 2023

Responsible for:

- Developed a real-time communication tool using Python sockets, adopted by 500+ internal users.
- Automated legacy workflows with PyQt5, cutting manual effort by 30%.
- **Tech Stack:** Python, Tkinter, PyQt5, TCP/IP, WebSocket

BACKEND DEVELOPER INTERN, BIT68, Jul 2022 – Oct 2022

- Built E-commerce APIs (product catalog, user auth) alongside different projects
- **Tech Stack:** Django REST Framework, Vagrant, PostgreSQL

PROJECTS

Senior Software Engineer Golang (PART-TIME)

- As a senior software engineer, I'm responsible for refactoring existing code and divide tasks on team members and review code and prs along with Design new features and solve problems related to business
- Technologies: Golang, Kafka, Redis, Gin.

Ads management Integration PROJECT (FREELANCE)

- Responsible for creating project to integrate with google ads and google tag manager along with creating other crud operations with authentication and authorization.
- Technologies: Git, Python, Fast API, AWS, celery, SQL alchemy, alembic, PostgreSQL.

Distributed chat messages (FREELANCE)

- Project does the following: messaging application between users and groups without database involved in the messaging also login and sign up along with other features.
- Technologies: Git, Python, fast API, mosquito broker, PostgreSQL, SQL model, Redis.

HR-SALES PROJECT (FREELANCE)

- Project does the following: Calculate quotes for the salesperson from different formulas and excel equation to save time for sales, track agents sales and insights, track chat agents activity and calculate monthly insights.
- Technologies: Git, Python, Django, Rest Framework, AWS.

SERVICE-PROVIDER PROJECT (FREELANCE)

- Project does the following: Saving users, verification for users, sending notifications, providing the places that are near to users based on the selected service and the place and other factors.
- Technologies: Git, Python, Django, Rest Framework, GraphQL.

HR SYSTEM (FREELANCE)

- Project does the following: Integrate with service to get the real time information and saved in the database, saving contracts, jobs based on contracts. Calculate commissions for sales.
- Technologies: Git, Python, FastAPI, PyQt5

TECHNICAL SKILLS

- Experience with Python
- Extensive Knowledge in OOP, Algorithms and Data Structure, Design Patterns
- Good Knowledge with C++
- Strong Knowledge with Django, FastApi
- Rest Framework, GraphQL, GRPC
- Experience with Java Script, Typescript, Node.JS, Express, NestJs
- SQL, SQLite, PostgreSQL, MongoDB, CASSANDRA
- REDIS, RABBITMQ, KAFKA

- Good with HTML5, CSS, React.JS
- Git And GitHub, Gitlab
- GitHub actions and Jenkins
- Tkinter, PyQt5
- Docker, basics of Terraform
- Experience with AWS services, Azure
- PyTest, Unittest
- Good knowledge with ruby and ruby on rails
- Good knowledge with rust and actix
- Experience with Golang and Gin
- AGILE METHODOLOGIES
- JIRA, TRELLO
- SENTRY, ELK stack, Loki
